

Thriving Families

(formerly known as SOS)

Community Resource &
Healthcare Navigation

PROGRAM OVERVIEW

In our complicated society, finding help for life's challenges is grueling. KidsTLC's Thriving Families program is available to offer assistance in connecting children and families to KidsTLC's array of mental health services and caregiver training, as well as a variety of community services when facing daunting struggles like:

- Family division
- Behavioral health
- Homelessness
- Relationships

FEATURES & SERVICES

• **Resource & Healthcare Navigation:** Our specialists engage with community partners (local school districts, civic organizations and county services) to better connect children and families with limited awareness and/or poor access to:

- Quality physical, mental and behavioral healthcare
- Housing and basic needs.

• **Family Education & Support Groups:** Thriving Families at KidsTLC offers weekly education and support to parents, grandparents, relatives, adoptive parents, foster care providers and other caregivers.

With support from experienced parent liaisons and KidsTLC therapeutic professionals, families are given opportunities to:

- Discuss personal experiences
- Learn strategies to rebuild relationships
- Share parenting approaches
- Find hope and healing

Thriving Family support and training is also available in Spanish, called Que Onda Familias.
